DETAILED ACTION

1. This office correspondence is response to the applicant's after response filed on 02/02/2009.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Applicant's representative, Linda S. Zachariah (Reg. No. 48,057), and examiner arranged a telephone interview on July 15, 2008 and the interview agenda was to reach an agreement of allowance of claims 19-27 with examiner amendment that would make to these claims as follows:

In the claims:

Claim 19 has been rewritten as follows:

19. (Currently Amended) A ~~tangible~~ machine-readable storage ~~memory~~ medium having stored therein instructions that when executed by a machine result in the following:

storing encrypted metadata for determining a configuration of a redundant array of independent disks (RAID) storage;

receiving a request to write data to one or more locations in the RAID storage;

encrypting, based upon ~~[[the]]~~ at least one key, one or more respective portions of the write data to generate one or more respective portions of encrypted write data to be stored in the one or more locations of the RAID storage

generating, based upon the one or more respective portions of the encrypted write data, check data to be stored in the RAID storage; and selecting the one or more locations in the RAID storage for storing the one or more respective portions of the encrypted write data by translating the one or more locations specified in the request into one or more physical or logical locations in the RAID storage based at least upon the stored encrypted metadata so as to permit the one or more respective portions of the encrypted write data to be distributed among two or more storage devices comprised in the RAID storage.

Claim 20 has been rewritten as follows:

20. (Currently Amended) The tangible machine-readable storage memory medium of claim 19, wherein:

the check data comprises one of parity data and a copy of the encrypted write data.

Claim 21 has been rewritten as follows:

21. (Currently Amended) The tangible machine-readable storage memory medium of claim 19, wherein the instructions when executed by the machine also result in:
storing the at least one key in memory; and in response to an attempt to tamper with the at least one key, erasing the at least one key.

Claim 22 has been rewritten as follows:

22. (Currently Amended) The tangible machine-readable storage memory medium of claim 19, wherein the instructions when executed by the machine also result in:

determining, based upon one or more credentials, whether to permit execution of one or more operations involving the RAID storage.

Claim 23 has been rewritten as follows:

23. (Currently Amended) A tangible machine-readable storage memory medium having stored therein instructions that when executed by a machine result in the following:

storing encrypted metadata for determining a configuration of a redundant array of independent disks (RAID) storage;

receiving a request to retrieve requested data from one or more locations in the RAID storage,

translating the one or more locations specified in the request into one or more physical or logical locations in the RAID storage based at least upon the stored encrypted metadata;

retrieving one or more respective portions of encrypted data from the one or more translated locations in [[a]] the RAID storage and

decrypting, the one or more respective portions of the encrypted read data retrieved from the storage based upon at least one key to generate one or more respective portions of read data.

Claim 24 has been rewritten as follows:

24. (Currently Amended) The tangible machine-readable storage memory medium of claim 23, wherein the instructions when executed by the machine also result in:

prior to the decrypting of the one or more respective portions of the encrypted data, determining, based upon one or more credentials, whether the request is authorized.

Claim 25 has been rewritten as follows:

Art Unit: 2436

25. (Currently Amended) The ~~tangible~~ machine-readable storage ~~memory medium~~ of claim 24, wherein the instructions when executed by the machine also result in: generating the at least one key based upon at least one of One or more tokens and one or more passwords.

Claim 26 has been rewritten as follows:

26. (Currently Amended) The ~~tangible~~ machine-readable storage ~~memory medium~~ of claim 23, wherein[[:]]the instructions when executed by the machine also result in encrypting [[the]] metadata to generate the encrypted metadata based upon the at least one key.

Claim 27 has been rewritten as follows:

27. (Currently Amended) The ~~tangible~~ machine-readable storage ~~memory medium~~ of claim 26, wherein:

the metadata comprises partition information.

Allowable Subject Matter

3. Claims 1-28, and 30 are allowed. The following is an examiner's statement of reasons for allowance: In interpreting the claims, in light of the Specification and the applicant's amendments filed on 04/09/2008, the Examiner finds the claimed invention to be patentably distinct from the prior art of record.

4. Kashima et al (US patent 5,485,598) is concerned with a RAID system utilizing separate cache memories for the host system and the check data. He discloses generating, based upon the one or more respective portions of the encrypted write data, check data to be stored in the RAID storage, and selecting the one or more locations so as to permit the one or more respective portions of the encrypted write data to be distributed among two or more storage devices comprised in the RAID storage.

5. Murthy et al (US patent publication 20030084290) is directed to a distributed security architecture. He is concerned with encrypting, based upon at least one key, one or more respective portions of write data to generate one or more respective portions of encrypted write data to be stored in the one or more locations.

6. However the totality of each element and/or step in claims 1, 5, 10, 19, 23, and 28 are not alluded to in the combined art of Kashima and Murthy. Their teachings either individually or in combination failed to teach or suggest all the limitations of these independent claims. More specifically, the combination of Kashima and Murthy does not teach or suggest "storing encrypted metadata for determining a configuration of redundant array of independent disks (RAID) storage; receiving a request to write data to one or more locations "n the RAID storage" as recited in claim 1. Similarly, the combination of Kashima and Murthy does not teach or suggest "selecting the one or more locations in the RAID storage for storing the one or more respective portions of the encrypted write data by translating the one or more locations specified in the request into one or more physical or logical locations in the RAID storage encrypted metadata" as recited in claim 1. Accordingly, claims 1, 5, 10, 19, 23, and 28 is allowable over the combination of Kashima and Murthy. So, Claims 1-28, and 30 are allowable by virtue of their dependency upon claim 1, 5, 10, 19, 23, and 28 and also due to additional limitations recited in these claims. Therefore, for the foregoing reasons, examiner withdraws of the rejection of claims 1-28, and 30 under 35 USC §103(a) as being obvious over Kashima in view of Murthy.

6. However, the prior art of record fails to teach or suggest some of the steps of the present claim invention. Examiner performed an updated search and unable to find any prior art to disclose all the steps mentioned in the independent claims.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Examiner considers the newly submitted IDS (dated 11/10/2009, and 02/02/2009). However, the claims are still allowable over the cited prior arts.

Conclusion

9. Claims 1-28, and 30 are patentable.

10. Claims 29, and 31-33 are cancelled.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad w. Reza whose telephone number is 571-272-6590. The examiner can normally be reached on M-F (9:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MOAZZAMI NASSER G can be reached on (571)272-4195. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
